## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14 and 21, drawn to a line tensioning device with locking means.

Group II, claim(s) 15-20, drawn to a method of tensioning line.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of the Group I is a line tensioning device with locking means for securing the line. The special technical feature of the Group II is a method of tensioning line. Since the special technical feature of the Group I claims and the special technical feature of the Group I invention is not present in the Group II claims, unity of invention is lacking.
